

Internet Programming 1

Worksheet 23.2:

Editing HTML Files with JavaScript Code

The purpose of this exercise is to :

- get you used to editing HTML files with JavaScript code
- see how JavaScript code is embedded in an HTML document

Your mission :

- start your preferred Web browser and open the file '**exercise1.html**' located in the '**Examples**' folder on your desktop
- open this file in Notepad and make the following changes, testing your work after each change

```
<HTML>

<HEAD>

<SCRIPT LANGUAGE="JavaScript" TYPE="text/javascript">

<!-- hide script from older browsers window.defaultStatus = 'Example 1';

// change this text //

end script hiding --> </SCRIPT>

</HEAD>

<BODY>

<P> This is a simple demonstration of how JavaScript works. </P>

<SCRIPT LANGUAGE="JavaScript" TYPE="text/javascript">

<!-- hide script from older browsers document.write ('Hello world!');

// change this text

// end script hiding --> </SCRIPT>

</BODY>

</HTML>
```
